Re: WT Docket 11-65

Dear Chairman Genachowski and Commissioners:

At the Nebraska Hispanic Chamber, we aim to advance among other things, the economic condition and educational attainment of the Hispanic population of our great state. We wholeheartedly support AT&T's purchase of T-Mobile, as we feel the resulting network infrastructure will do wonders to advance all Nebraskans.

Broadband Internet is an amazing tool that changed the way we work, learn, play and stay in touch with loved ones. With it, people in rural and underprivileged areas can still receive the same attention for educational and health purposes. Broadband also helps Nebraska businesses of all sizes stay competitive in the national and global marketplaces.

However, there is a broadband gap in this nation...not just between rich and poor or urban and rural, but also between whites and minorities. AT&T's deal with T-Mobile will bring faster and more reliable Internet to more places sooner than otherwise possible. This will help all Nebraskans stay connected, improving the quality of life in our state and all across the country.

Sincerely,

Nebraska Hispanic Chamber of Commerce
